Deltapath UC Platform Has A Lot to Offer

Interoperability: The Nucleus of Deltapath's UC Platform

Deltapath's UC platform is built with the workplace of the future in mind – a workplace that does not believe in a single branded approach and where everyone is connected because devices interoperate. Different brands of endpoints such as Cisco phones, Polycom phones, and other brands coexist and work with each other.

Dolby Voice: Bring New Features and Enhancements to Communication

Deltapath's end-to-end UC solution has been enriched by Dolby, a brand renowned for delivering innovative audio solutions. Dolby Voice makes every call exceptionally clear, natural, and productive by delivering an in-person experience. All participants get stunning audio quality as background noise is suppressed and each person on the call is heard from a distinct virtual location, so it's easy to always identify who's speaking and follow the conversation. Everyone who speaks is heard—not just the loudest few—even when different people speak at once. As a result, your conversation flows naturally and participation increases. This improved experience can be accessed anywhere—via your desktop, mobile, and even in meeting rooms with the Dolby Conference Phone.

Value Added Services

The Deltapath's UC platform comes with many add-on services to complement your core services and help you improve the benefits you offer customers and employees. Here are some of our popular value-added services:

» Cinch, Deltapath's inbound contact center allows agents to fulfill a variety of services and improve customer satisfaction.
» Proactive Engagement, Deltapath's outbound contact center allow agents to work on one or multiple campaigns that play a key role in lead generation, sales, subscriptions, feedback surveys, debt collection and more.
» Push-to-Talk is an additional communication channel that offers instant connectivity to one person or a group of people.

Legacy Models

From legacy endpoint models to the latest models, the Deltapath UC Platform is built to support a plethora of endpoints.

» Serviced Office provides robust tools designed to help companies manage their serviced offices.
» Salesforce.com integration allows companies to create more engaging customer and employee experiences that can give you an advantage over competitors.
» Service Provider grade Call Billing allows you to optimize revenue and manage your telephone services.

The Cisco Replacement Program for CUCM Customers

It's like getting a brand-new house for free and only being responsible for Property Tax and the Property Management Fee

For the same cost of what you pay for your annual Cisco maintenance contract, Deltapath will upgrade your Cisco Unified Communications System to its Deltapath Unified Communications Platform with Dolby Voice.

See How the Program Works

Provide your annual Cisco maintenance bill.

Provide your current CUCM installed license summary.

Provide your current voice infrastructure inventory/ Bill of Material (BOM) to ensure compatibility.

Define your migration plan -- Big Bang vs Parallel. Reboot phones and migrate PRI over.

Deltapath will deliver the appliances and gateways that match with your current BOM.

Sign Contract

You have been upgraded!

See How the Program is Delivered: Deployment Options

You can deploy a Deltapath appliance or Deltapath virtual edition UC software license on a virtualized server to support your business.
